

A+ DRIVE APP

Basic Functionality — Client Review

1. Purpose

This document presents a simplified scope for the A+ Drive mobile app. The goal is to provide clients with the basic tools they need to manage bookings, earnings, rates, website content, vehicles, availability, support, subscription information, and profile settings from one mobile application.

The scope has been intentionally simplified for the initial version by removing advanced synchronization, payout-management, geographic-zone pricing, detailed state-management, and bank-account management features.

2. Basic App Features

Login / Access

- Login using the client's registered phone number.
- Receive and verify a 6-digit OTP.
- Resend OTP after the required cooldown.
- Open the app after successful verification.

Home Dashboard

- Show today's bookings.
- Show the next upcoming booking.
- Show basic business/booking metrics.
- Show simple site status.
- Provide shortcuts to common actions such as bookings, rates, and earnings.

Bookings

- View bookings in a calendar or list.
- Filter bookings by basic status such as upcoming, completed, or canceled.
- Open booking details including passenger information and trip price.
- Confirm or cancel a booking.
- Contact the passenger where applicable.
- Create a manual booking.

Earnings

- View basic earnings for a selected period.
- View available balance.
- View payout/deposit history.
- View bookings with pending or failed payments.
- Provide a basic earnings export if required.

Rates

- View and edit basic pricing.
- Manage tiered per-mile rates.
- Edit base fare.
- Edit wait-time rate.
- Edit applicable surcharges such as night or airport charges.
- Show a live price simulator so the client can see the calculated trip price.

My Site

- Preview the client's website.
- Edit logo and colors.
- Update the main photo.
- Edit headline and subheadline.
- Manage services displayed on the site.
- Edit contact and social information.
- Show site health/status.

Vehicles

- View the client's vehicles.
- Add basic vehicle information such as make and model.
- Activate or deactivate a vehicle.
- Delete a vehicle.

Availability

- Set the regular availability schedule for each day.
- Block specific dates.
- Unblock previously blocked dates.

Help & Support

- Contact A+ Drive support by email.
- Contact A+ Drive support through WhatsApp number.

Subscription

- View the current A+ Drive plan.
- View subscription payment information.
- View subscription invoices.
- Show a notification when a subscription payment requires attention.

Profile & Settings

- View and edit basic client information such as name, phone, and email.
- Manage push notification preferences.

- Change the application language.
- Support English, Spanish, and Portuguese.

3. Basic Integrations

Integration	Basic Purpose
Client Website	Read bookings and update basic client-managed information such as rates, vehicles, availability, and website content.
Stripe Connect	Display basic earnings/payment information and support the client's payment flow.
SMS / OTP Provider	Send the 6-digit verification code for login.
Support System	Allow clients to contact A+ Drive support from the app.
Push Notifications	Notify clients about important bookings and payment-related events.

4. Simplified Scope — Removed from Initial Version

- Advanced draft → published synchronization model.
- Detailed local/server/draft/published state-management and synchronization rules.
- Manual vs. automatic payout configuration.
- Automatic deposit/payout scheduling.
- Geographic flat-rate zones independent of tiered pricing.
- Bank-account management and replacement from the app.
- Advanced Stripe Connect onboarding and payout configuration flows.
- Complex publish failure/retry workflows.
- Detailed internal synchronization architecture.

5. Basic User Flow

Step	User Action
1	Open the A+ Drive app.
2	Enter registered phone number and verify OTP.
3	Open the Home dashboard.
4	Manage bookings, rates, vehicles, availability, website content, and earnings.
5	Use Help when support is required.
6	Manage profile, notifications, language, and subscription information from settings/menu.

6. Initial Version Goal

The initial version should focus on a simple, reliable client experience. Clients should be able to log in, see and manage their bookings, update basic pricing, manage vehicles and availability, update basic website content, view earnings, contact support, and manage their basic account settings.

Advanced financial, synchronization, publishing, and configuration capabilities can be considered for a future phase after the basic application is reviewed and approved.

Prepared for client review • Simplified scope based on the A+ Drive Technical Specification, August 2026.
